

7. Actividades guiadas: expresiones con sumas y restas

1 Completa y calcula.

$$a) \overbrace{6 - 3 + 9 - 5 - 7 + 4} = \square - \square = \square$$

$$b) \overbrace{8 - 4 - 6 - 7 + 11 + 5} = \square - \square = \square$$

$$c) \overbrace{3 - 5 + 8 - 7 - 4 + 2} = \dots\dots\dots$$

$$d) 10 - 15 - 13 + 8 - 6 - 4 = \dots\dots\dots$$

2 Elimina paréntesis y, después, calcula.

$$a) 12 - (+5) = 12 \bigcirc \square = \square$$

$$b) 6 - (-3) = 6 \bigcirc \square = \square$$

$$c) 8 + (-2) = 8 \bigcirc \square = \square$$

3 Elimina paréntesis y resuelve.

$$a) 5 + (4 - 11) = 5 \bigcirc \square \bigcirc \square = \dots\dots\dots$$

$$b) 2 - (7 - 10) = 2 \bigcirc \square \bigcirc \square = \dots\dots\dots$$

$$c) 15 + (8 - 4 - 3 + 9) = \dots\dots\dots$$

$$d) 13 - (5 + 12 + 4 - 7) = \dots\dots\dots$$

7. Actividades guiadas: expresiones con sumas y restas

4 Calcula, operando primero dentro de los paréntesis.

$$\begin{aligned} \text{a) } 9 - (7 - 12) + (4 - 6) &= 9 - (\bigcirc \square) + (\bigcirc \square) = \\ &= 9 \bigcirc \square \bigcirc \square = \square \bigcirc \square = \square \end{aligned}$$

$$\begin{aligned} \text{b) } 6 + (4 - 6) - (12 - 5) &= 6 + (\bigcirc \square) - (\bigcirc \square) = \\ &= \square \bigcirc \square \bigcirc \square = \square \bigcirc \square = \square \end{aligned}$$

$$\begin{aligned} \text{c) } (7 - 10) - (5 - 4) - (2 - 8) &= (\bigcirc \square) - (\bigcirc \square) - (\bigcirc \square) = \\ &= \dots\dots\dots \end{aligned}$$

$$\begin{aligned} \text{d) } (9 - 5 - 3 + 1) - (7 - 8 - 12) &= (\square \bigcirc \square) - (\square \bigcirc \square) = \\ &= \dots\dots\dots \end{aligned}$$

5 Opera.

$$\text{a) } 5 - [6 + (-8)] = 5 - [6 \bigcirc \square] = 5 - [\square] = \dots\dots\dots$$

$$\text{b) } 4 + [1 - (5 + 6)] = 4 + [1 - (\square)] = \dots\dots\dots$$

$$\text{c) } (7 - 9) - [12 + (5 - 8)] = (-2) - [12 + (\square)] = -2 - [12 \bigcirc \square] = \dots\dots\dots$$
