

1 Observa cada recta y escribe su pendiente (simplificada todo lo posible) y su ecuación.

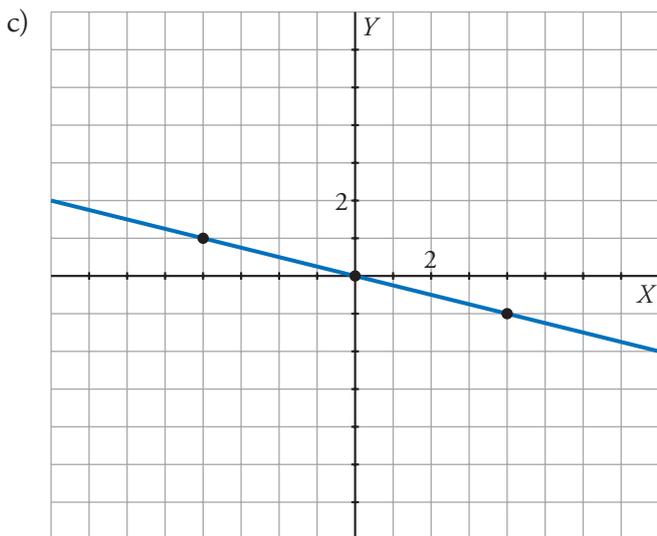

Pendiente: $m = \frac{\square}{\square}$

Ecuación: $y = \frac{\square}{\square}x$

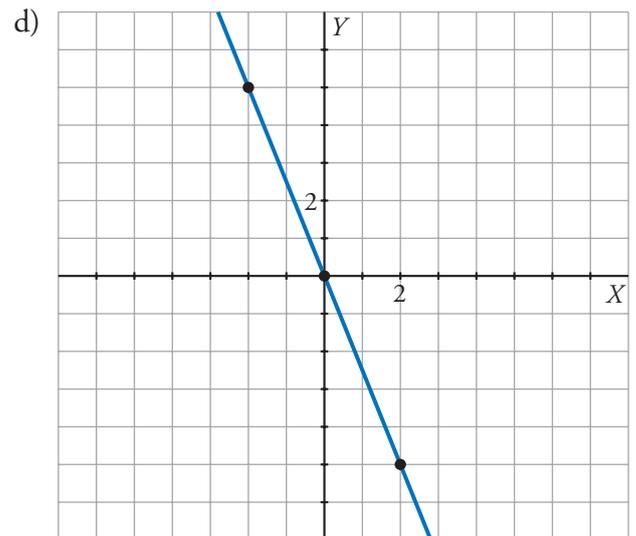

Pendiente: $m = \frac{\square}{\square}$

Ecuación: $\square = \frac{\square}{\square} \square$

Pendiente: $m = \frac{\square}{\square}$

Ecuación: $\square = \frac{\square}{\square} \square$

Pendiente: $m = \frac{\square}{\square}$

Ecuación: $\square = \frac{\square}{\square} \square$
